## User Stories

### 1. Doctor User Stories:

- As a Doctor, I want to view my patients' medical histories so that I can make informed decisions.
- As a Doctor, I want to update patient records after each consultation so that records stay accurate.
- As a Doctor, I want to prescribe medications electronically so that the pharmacy can process them efficiently.
- As a Doctor, I want to receive alerts for critical lab results so that I can respond quickly.
- As a Doctor, I want to manage my appointment schedule so that I can plan my day efficiently.

### 2. Nurse User Stories:

- As a Nurse, I want to record patients' vital signs (temperature, blood pressure, pulse, etc.) so that doctors have up-to-date information for treatment decisions.
- As a Nurse, I want to view the medication schedule for each patient so that I can administer the correct drugs at the right time.
- As a Nurse, I want to receive alerts for critical changes in a patient's condition so that I can take immediate action or inform the doctor.
- As a Nurse, I want to update the progress notes for each shift so that the next shift has a clear handover of patient status.
- As a Nurse, I want to access patient care plans so that I can follow specific instructions related to treatments or procedures.

### 3. Patient User Stories:

- As a patient, I want to book an appointment online so I can avoid long wait times on the phone.
- As a patient, I want to view my medical history and lab results so I can track my health progress.
- As a patient, I want to request a refill for my medication, so I don't run out of essential drugs.
- As a patient, I want to edit my contact details so the hospital can reach me in case of emergencies.
- As a patient, I want to see my billing statements and pay online so I can manage my expenses conveniently.

## 4. Pharmacist User Stories:

- As a pharmacist, I want to search the inventory for a specific medicine so I can confirm stock availability before dispensing it to a patient.
- As a pharmacist, I want to view and validate digital prescriptions from doctors so I can accurately prepare medications for patients.
- As a pharmacist, I want to record new medicine shipments and expired stock, so the inventory is always up to date.
- As a pharmacist, I want to log dispensed medicines with patient details so I can maintain an audit trail for compliance.
- As a pharmacist, I want to review and approve patient refill requests so I can ensure continuity of care without over-prescribing.

## 5. Administration User Stories:

- As a hospital billing officer, I need to access insurance coverage data to inform patients of potential out-of-pocket costs.
- As a human resources recruiter, I want to keep track of open residency positions across hospital departments so that I can adjust my published job listings.
- As a staff manager, I must monitor patient influx and peak periods to be able to create schedules and prevent understaffing.
- As a hospital financial executive, I need to review total overnight inpatient numbers to properly allocate resources to necessary departments.
- As a health service manager, I require up-to-date oversight of staff qualifications data to ensure compliance with medical regulations.
